### Reference for Humphries Construction

Oldfield and Company Property Analysts and Advisors Ltd is a Property Consultant Company predominantly based in Auckland.

One of our major services offered to our national and international clients is that of Project Coordinator for new building construction.

It was acting as Project Co-coordinator (and Principal's Representative) for Toyota New Zealand Ltd's building additions and alterations, that Humphries Construction first became known to Oldfield and Company.

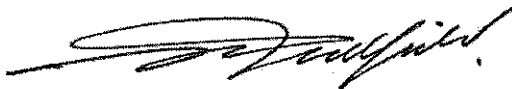

Over the past 3 to 4 years we have undertaken a range of diverse projects with Humphries Construction and seen them develop from being a competent Construction Company capable of undertaking work to a value of \$2,000,000 to \$5,000,000 to now proving they have the ability and organisation to undertake a major Warehouse construction project at close to \$10,000,000.

Our experience with Humphries Construction has been excellent. The Humphries Construction commitment to providing a quality product, on time and on budget has set them apart in the construction industry. No request has proved too difficult for them and their personnel (from Senior Management to site level employees) have been a pleasure to work with.

Since the first Toyota tendered project that Humphries won 3 to 4 years ago, Humphries has been successful in being awarded a number of other Toyota projects.

Oldfield and Company has no reservation recommending Humphries Construction to any prospective party wishing to have building construction work undertaken.

We would be happy to provide amplification on any of the above, or answer any further questions prospective clients may have.

Neil Oldfield  
Director
